

Some things you should know...

- Lash extensions are semi-permanent
- Application is painless
- Avoid getting your lashes wet for the first 8-10 hours after application.
- The first two weeks of wear will be the roughest on your new lashes as you get used to them.
- Eyelash extensions are weightless, and are attached to your own lashes, not your skin. These are not 'glam' lashes, such as strip lashes, they are *totally realistic*.
- Extensions for your bottom lashes are available.
- You should not curl, tint or perm your lashes while you are wearing the eyelash extensions.
- You should not wear waterproof mascara on your extensions.
- With proper care, your lash extensions should last 3 weeks or more. It is recommended you get a retouch every 2 weeks to keep them looking full. If you keep your appointments every 14 days (or 2 weeks), you will be charged the normal retouch rate \$50.00 After 2 weeks, you may incur a charge of up to \$75 for loss over and above normal, and after 3 weeks, you will be charged for a new set.
- **How it's done...**

Your lash specialist will place medical tape over your lower lashes so that your upper and lower lashes do not adhere during the procedure.

Synthetic lashes are applied individually by hand to each of your own lashes for a totally natural look. This procedure involves attaching anywhere between 60-80 individual lashes. There will be separating required during the drying process so the lashes do not appear clumpy, during separation you may experience a tugging sensation.

The extensions are made of synthetic silk, and are applied with tweezers and formaldehyde free adhesive. When the application is complete, your lashes will be sealed; first with a clear coating and then with a black sealer.

If you have any of the following medical conditions we regret that we will be unable to perform this procedure for you:

- Blepharitis
- Ptosis/Lid Lag
- Orbital Cellulitis
- Conjunctival Problems/Conjunctivitis
- Episcleritis/Scleritis
- Corneal Problems
- Severe Dry Eye
- Any type of Dermatitis
- Any form of infectious disease

Care

Proper maintenance for your new eyelash extensions is important for longer lasting, beautiful lashes. You will be given an instruction sheet with your first appointment. Follow it carefully and if you have any questions, contact your lash specialist.

In General

- Don't rub your lashes
- Be careful if you are a heavy sleeper. If you dig your face into your pillow, you may experience a lot more loss than normal.
- **Washing**
 - Use a make up remover towelett, wrapped around your finger and gently stroke downward while your eye is closed to remove mascara. Wipes remove the mascara easily and quickly and does not cause any loss. If you do not wear mascara, then of course you can skip this step.
 - After mascara is removed, the towelette is easily used to remove the make-up under the eye, and then the eyeshadow using the same technique of wrapping the towelette around your finger and carefully removing the make-up with your fingertip.
 - Wash your face the way you normally do, avoiding the eyes. A splash of water over the face and eyes is okay, just be mindful of the soap. If you are not careful, the soap could get into your eyes, and it may be difficult to seal your eyes shut to keep the soap out, so keep a dry towel handy.
 - PAT your face and lashes dry.
 - Apply whatever products you use, post-cleansing

Quick tips for best results

- For the first two days after application it is best to avoid swimming, saunas or steam rooms. After 2 days, it is okay to do these things, but you may experience more loss than normal.
- Keep your retouches regularly.
- Do not use any products that contain polyethylene glycol (PEG).
- Do not use an eyelash curler. Your extensions will have a nice natural upturn to them, you will not need one. If you prefer a more curled look, we can add more curled lashes during your re-touch.

- Never pick, pull or rub your lashes.
- If you experience any itching or irritation, contact your lash specialist immediately.

On the day of your appointment...

Do not wear make-up or contact lenses.

Shower before-hand so that you do not get your extensions wet for the required 8-10 hours.

Schedule your retouch within 14 days.

- **Do**

Get your shower out of the way before application

Arrive on time and without wearing make-up or contact lenses

Maintain your lashes regularly

Take a little extra care when dealing with your new lashes

Enjoy the attention you're going to get

Refer your friends

Don't

-
- **Rub, pick or pull on your lashes**

Use waterproof mascara, or any cosmetics that contain any glycol-based ingredients

Use oily products near lashes
